

## Domisphere Portal Manager Feature Comparison

Providing world class web site management using IBM portal

	<b>Feature</b>	<b>Standard IBM/ WCM</b>	<b>DPM</b>
1	Site Framework capability	Basic single hard coded hierarchy	Virtual hierarchy (allowing multi- site, multi-library virtual site framework superstructure)
2	Workflow	Only basic workflow (linear)	Vastly extended and enhanced with looping and branching capabilities
3	Draft portal pages	No	Yes
4	In-context editing	Limited	Full
5	Friendly URLs	Limited (requires Portal Administration to create URL mappings singly)	Automatic and more human readable
6	Top and side coordinated Navigators	Highly complex to implement with stylesheets	Very simple to implement using DPM tag library.
7	Multiple page capability on same URL allowing business to prototype different page layouts live	No	Yes
8	Full link management integrity between portal pages and content items	Partial and limited with Portal 6.1 and above. Requires Portal Administration skills	Fully automatic – no Portal Administrator required.
9	Page selection policy allowing different pages to be shown based on business rules (e.g. type of customer)	No (NOTE: Bundled portal personalisation only works on content items and visibility of portlets. It cannot be used to hide or show portal pages)	Yes
10	Portal search link integrity on content items	Partial. Requires Portal Administration to create page for every site area)	Fully working and automatic

Standard IBM Portal /WCM and Portal/WCM/DPM comparison

	<b>Feature</b>	<b>Standard IBM/ WCM</b>	<b>DPM</b>
11	Mix and match functionality on a single portal page	Yes	Yes
12	Fly out that display portal structure and allows full drag and drop restructuring of the site	No	Yes
13	Rearrange page layout for every content item (Dynamic presentation template)	No (Portal content enhancements relate only to site areas not content items)	Yes
14	Have multiple layouts for any one single content item	No	Yes
15	Syndicated Portal themes.	No	Yes. This allows WCM artefacts to control the Portal Theme
16	Template driven portal page creation	Yes – pages created manually by privileged user only	Yes – pages created automatically
